

# 10 tips for getting started with Google Classroom

Written by [Jeff Dunn](#)

Google Classroom is now available to all Google Apps for Education schools.

Make the most of this new tool with these best practices:

1

Kick off in-class discussion when you post topics and questions to the Stream.

2 

Use Classroom for any subject and attach relevant videos, websites, documents and more.

3 

Save time at the photocopier when you use the "make a copy for each student" feature.

4

Upload any file - PDFs, Office files, images - to Google Drive and assign them to students in Classroom.

# 10 tips for getting started with Google Classroom

Written by [Jeff Dunn](#)

5 

Access Classroom from a web browser on any device to stay on top of work at school or on-the-go.

6 

Connect with shy students online through the communication tools in Classroom and Google Docs

7 

Save trees (and money) when you go paperless with Google Classroom.

8 

Share announcements with your whole school by putting all teachers and students in a "class."

9

Create a class for each subject or learning level and assign different materials to personalize learning.

10

Set up Classroom for younger students who don't use Gmail by having your admin create Drive accounts for them.
